EXPERIENCEfresher

SKILLS

subjects skills:

1. java

1. basics of JDK,JRE,JVM
2. control flow statements
3. switch
4. methods
5. oops
6. exception and exception handling
7. arrays
8. Strings
9. collections

2. sql

1. basics of DBMS
2. DQL
3. DML,DDL,DCL,TCL
4. TABLE creation
5. subqueries
6. joins
7. normalisation
8. substring
9. single row function
10. multirow function

3. webtech

1. html
2. css
3. java script

4. Manual testing

1. blackbox testing
2. whitebox testing
3. unit testing
4. integration testing

software skills

1. IT troubleshooting

1. Restarting your computer
2. Freeing up hard disk space
3. Uninstalling unnecessary programs
4. Installing browser add-ons

2. Microsoft Office

1. Spreadsheets
2. Cloud-based storage

- 3. Email management
- 4. Video conferencing

- 5. system testing
- 6. acceptance testing
- 5. selenium
 - 1. webdriver architecture
 - 2. OOAD principles
 - 3. webdriver methods
 - 4. locators
 - 5. webelement

PROJECTS:

- 1. bank application

it was the simple application

we had created for creating user accounts same as like in the banks and we maintaining records of deposit and withdrwal and deposit of money and available balance .foe this we had used the oops principle first is that encapsulation for our account details, abstraction for requirement specification ,overrriding for implementation and we used SQL for database creation table conataining accounts of different ,employees with their actions

- 2. whether forecasting app: this application is used to find out whether condition based on your location it tells you the humidity, temperature,pressure and wheather it is to rain or not,cold,hot day. it also tells about wind blowing for this we used java ,java servlet,html,css and javascript
